

## **RYGAARD LOGGING'S AXMEN SEE CLEAR RESULTS FROM DEFOG IT ANTIFOG FOR SAFETY EYEWEAR**

December 17, 2010 – Valley View, Ohio – Rygaard Logging is a fixture in the Pacific Northwest, now known worldwide from their connection to Axmen, the Discovery Channel TV show. When Defog It asked Gabe Rygaard if he'd test [Defog It antifog](#) samples on safety eyewear in the brutal heat, cold, rain, fog, and exertion his workers face every day, he agreed. The results were eye opening.

Katy Rygaard, responded with enthusiasm, reporting "Gabe says [the Defog It cloths] work 'just fine.' He is happy that they do in fact work...He has actually used them on the windshield of his shovel to keep it from fogging up and it was successful."

First used by the military worldwide, Defog It is the proven safety choice in the toughest workplace environments where heat, cold, humidity and exertion cause fogged safety eyewear. It's used in utilities, pulp and paper, mining, chemical processing, forestry, law enforcement and other industries. The product is safe and effective on safety glasses, goggles and faceshields.

"Fogged eyewear is a serious safety problem in so many workplaces," says John Swett, Vice President of Sales and Marketing for Nanofilm, maker of Defog It. "We're proud that users tell us Defog It is improving safety in utilities, pulp and paper, mining, chemical processing, law enforcement and other industries."

Lab tests confirm the Defog It's high performance. In one test, a lens treated with Defog It was held over constant hot steam for 60 minutes without fog forming. Similar products failed in as little as 5 minutes. In another test, lenses coated with Clarity Defog It were moved between cold and hot environments 100 times without fog forming.

Defog It is available as a liquid or reusable cloths. More information, pricing and performance videos are available at [www.defogitworks.com](http://www.defogitworks.com) or by calling 1-888-ENDS-FOG.

Nanofilm, founded in 1985, is the maker of Clarity Defog It and a global optical leader in lens care and coatings. Millions of people around the world use Nanofilm products, including Clarity Clean It™, Clarity Defog It™ and other lens care products, as well as nanotechnology-enabled coatings.
