

WITH DEFOG IT ANTIFOG “YOU DON’T HAVE TO DEAL WITH SQUINTING THROUGH FOGGY LENSES” SAYS CONSTRUCTION EXPERT

December 29, 2010 – Valley View, Ohio – Master carpenter Robert Robillard, recently did a field test of [Defog It antifog](#) and now recommends it in [his blog](#) for construction professionals. “The Defog It results were immediately noticeable. Normally I would have had to remove my glasses several times to wipe them dry or worse yet toss them aside in complete frustration,” says Robillard. He adds, “If you wear glasses or goggles you no longer have to constantly wipe them clean, and you don’t have to deal with squinting through foggy lenses. I recommend trying this product.”

Robillard also spotlights the danger of fogged eyewear for workers, saying “There is nothing worse than performing a carpentry or Do-it-yourself project, and knowing that the function your performing warrants wearing safety glasses but choosing not to wear them because the glasses always fog up and blur your vision.” if you are experiencing a similar problem.

“Defog It antifog is proven to give workers the fog-free safety eyewear they need to work safely in construction, pulp and paper, mining, manufacturing and other workplaces,” says John Swett, Vice President of Sales and Marketing for Nanofilm, maker of Defog It.

First used by the military worldwide, Defog It is the proven safety choice in the toughest workplace environments where heat, cold, humidity and exertion cause fogged safety eyewear. It’s used in utilities, pulp and paper, mining, chemical processing, forestry, law enforcement and other industries. The product is safe and effective on safety glasses, goggles and faceshields.

Lab tests also confirm the antifog’s high performance. In one test, a lens treated with Defog It was held over constant hot steam for 60 minutes without fog forming. Similar products failed in as little as 5 minutes. In another test, lenses coated with Clarity Defog It were moved between cold and hot environments 100 times without fog forming.

Defog It is available as a liquid or reusable cloths. More information, pricing and performance videos are available at [defogitworks.com](#) or by calling 1-888-ENDS-FOG.

[Nanofilm](#), founded in 1985, is the maker of Clarity Defog It and a global optical leader in lens care and coatings. Millions of people around the world use Nanofilm products, including Clarity Clean It™, Clarity Defog It™ and other lens care products, as well as nanotechnology-enabled coatings.
