

**DEFOG IT™ ANTI-FOG TESTED, PROVEN BY MASSACHUSETTS  
FIREFIGHTERS: “PERFORMED GREAT,” SAYS FIREFIGHTER**

March 15, 2010 – Valley View, Ohio – Members of the Hopkinton, Massachusetts, Fire Department put [Defog It](#) anti-fog towelettes to the test in recent rescue training sessions and certified that “the product performed great,” according to the department’s Francis Clark.

Defog It anti-fog towelettes and Defog It anti-fog liquid, made by Nanofilm, have a formula used by the military around the world to prevent fogged eyewear in vision-critical situations. Just one application can help keep optics fog-free up to all day. Defog It anti-fog is safe and effective on safety glasses, safety goggles, faceshields and eyeglasses, even high-tech anti-reflective and super-hydrophobic lenses.

Firefighter Clark described the Defog It anti-fog performance for the [Hopkinton Fire Department](#) this way. “We had tech rescue training today for structural collapse. We had it inside a building that had previously had a fire in it. Lots of soot and dust and the safety glasses fogged up easily in the cold weather. I had a few of the members apply the Defog and It [which] kept the lenses clear for the remainder of the morning. The guys seem to like the easy approach to it. We were cutting above our heads with the saws, in the dust, so good visibility was a must. The product performed great.”

“Defog It is formulated especially for vision-critical situations like firefighters, police officers and other first responders,” adds John Swett, Nanofilm Vice President of Sales and Marketing. “Now it’s being proven by real firefighters in real-world situations.”

The product has been [rigorously tested](#) for performance. In one test, a lens treated with Defog It was held over constant hot steam for 60 minutes without fog forming. Similar products failed in as little as 5 minutes. In another test, lenses coated with Defog It were moved between cold and hot environments 100 times without fog forming. A video demonstrates the performance of Defog It. In addition, the product has been tested in the field.

Other firefighters have also anti-fog performance of Defog It.

- “I was skeptical at first but this product really works.” -- Donald Sipple
- I am a volunteer fireman and every one at the department liked it just as much as I did. So, yes. I would recommend it to everyone.” -- Gene Brazier
