

DEFOG IT ANTI-FOG EARNS SEAL OF APPROVAL FROM HANDY MAGAZINE

January 7, 2010 – Valley View, Ohio – Members of the 750,000-person Handyman Club of America have tested and give their seal of approval to [Nanofilm Defog It anti-fog towelettes](#) for safety glasses, safety goggles, faceshields and eyeglasses. Club members, which include DIY-ers and professionals, agree that the Defog It anti-fog treatment exceeds all testing standards for performance, ease of use and convenience.

“Fog-free eye protection is a crucial safety issue for DIY-ers and professional craftsmen,” says John Swett, Nanofilm Vice President of Sales and Marketing. “The Handyman Club Seal of Approval proves Defog It is the anti-fog solution people can trust.”

86% of Handyman Club users would recommend Defog It anti-fog protection to a friend, many citing its high performance in demanding work situations.

- “Usually when I use a dust mask I get extensive fogging on my goggles. After using Defog It Dry Towelettes the goggles did not fog up at all.”
- “I used Defog It on my glasses in my forge shop and never had any of the normal fogging of lenses that I normally have. It is easy to use.”
- “Works great. Used on my shop glasses which always seem to fog over when I am working hard. After using this product, no more fogging.”
- “Since I wear a face mask when working on my lathe, I used to fog my glasses. With this product I have had no problems with fogging.”
- “As a MOV/AOV technician that works at nuclear power plants all over the country, I would have to say they work great. We are provided with anti fog spray and wipes at all sites. The Defog It product worked better for me than did the anti fog product provided for us.”

Defog It anti-fog towelettes and anti-fog liquid are the [anti-fog solution](#) that’s safe and effective on the lenses of all safety glasses, goggles, faceshields, eyeglasses and optics, even those with anti-reflective and super-hydrophobic surfaces. A single application can keep optics fog-free up to all day.

The Defog It fog prevention formula is used by the military around the world for optics in vision-critical situations and its performance has been proven in rigorous lab tests. In one [test](#), when treated lenses were held over constant hot steam, Defog It kept the lens fog-free for a full 60 minutes. Competitors failed in as little as 5 minutes.

In another [test](#), coated lenses were repeatedly moved between freezing and room temperatures, simulating a worker moving between hot and cold environments. Fog formed almost immediately with competitive products, but Defog It anti-fog treatment stayed clear for 100 cycles of heat and cold.

Defog It is available at [Amazon.com](https://www.amazon.com) and other retailers. Three reusable towelettes in a plastic carrying case sell for \$7.49 (MSRP). A half-ounce bottle of the all-in-one cleaner and anti-fog liquid is \$4.99 (MSRP). More information is available at www.nanofilmproducts.com or by calling 1-888-ENDS-FOG.

Nanofilm, founded in 1985, is a global optical leader in lens care and coatings. Millions of people around the world use Nanofilm products, including Clarity Clean It™, Clarity Defog It™ and other lens care products, as well as nanotechnology-enabled coatings. More information is available at www.nanofilmproducts.com.
