

## **DEFOG IT™ ANTI-FOG PROMOTES EYE SAFETY FOR EMERGENCY RESPONSE AND DISASTER RECOVERY PERSONNEL**

February 25, 2010 – Valley View, Ohio – Nanofilm, maker of [Defog It](#) anti-fog towelettes and liquid, is committed to promoting eye safety for emergency response and disaster recovery professionals. “The National Institute for Occupational Safety and Health guidelines recommend that, at minimum, emergency workers at a structural collapse site where there is some risk of exposure to dust, chips, and flying particles use safety glasses and a treatment to prevent fogging,” says John Swett, Vice President of Sales and Marketing. “Nanofilm developed Defog It anti-fog for safety glasses, goggles and faceshields precisely for use in the vision-critical situations emergency response workers face.”

Defog It anti-fog liquid and Defog It anti-fog towelettes have a formula used by the military around the world to prevent fogged eyewear in vision-critical situations. Just one application can help keep optics fog-free up to all day. Defog It anti-fog is safe and effective on safety glasses, safety goggles, faceshields and eyeglasses, even high-tech anti-reflective and super-hydrophobic lenses.

The product has been [rigorously tested](#) for performance. In one test, a lens treated with Defog It was held over constant hot steam for 60 minutes without fog forming. Similar products failed in as little as 5 minutes. In another test, lenses coated with Defog It were moved between cold and hot environments 100 times without fog forming. A [video](#) demonstrates the performance of Defog It. In addition, the product has been tested in the field. Comments from firefighters confirm the anti-fog performance for first responders. Other firefighters have also anti-fog performance of Defog It.

- “I was skeptical at first but this product really works.” -- Donald Sipple
- I am a volunteer fireman and every one at the department liked it just as much as I did. So, yes. I would recommend it to everyone.” -- Gene Brazier

Defog It is available at [www.defogitworks.com](http://www.defogitworks.com), Amazon and other retailers. More information is available at 1-888-ENDS-FOG.

Nanofilm will be developing eye safety case histories and safety programs in the coming months to help organizations and workers increase eye safety. Additional resources on Eye Safety for Emergency Response and Disaster Recovery, including anti-fog protection recommendations, can be found on the Centers for Disease Control’s [NIOSH Safety and Health topics](#).

Nanofilm, founded in 1985, is a global optical leader in lens care and coatings. Millions of people around the world use Nanofilm products, including Clarity Clean It™, Clarity Defog It™ and other lens care products, as well as nanotechnology-enabled coatings.
