Defog It Anti Fog Educates Workers about Fogging Danger Zones through Contest and Prizes

June 29, 2011 – Valley View, Ohio – Educational experts agree that incentives often have a positive effect to reinforce learning. That’s why Defog It anti fog has partnered with [Environmental Health and Safety Magazine](#) to create an online [Pop Quiz](#) about The 5 Fogging Danger Zones. Participants with perfect scores are rewarded with a chance to win 100 free Defog It anti fog towelettes, a \$105 value. The Pop Quiz is available at <http://popquiz.ehstoday.com/nanofilm-062011/default.aspx> through July 9, 2011. Participants can retake the test to improve their scores as often as they want, and there’s even a link to a whitepaper on the Defog It website to assist players.

“Fogged safety eyewear in the workplace is serious business,” says John Swett, Vice President of Sales and Marketing. “If having a little fun and offering prizes entices more people to learn about safety, Defog It is making a difference.”

Questions in the Pop Quiz recap information from the new Defog It anti fog whitepaper, *In the workplace there are five situations that can increase hazardous fogging of safety, 5 Fogging Danger Zones that Make Safety Eyewear Unsafe*. The report examines fogging factors that compound heat, cold, humidity or worker exertion, and which can decrease compliance with protective eyewear mandates. The whitepaper can be downloaded free at the Defog It website, www.defogitworks.com.

First used by the military worldwide, Defog It is the proven safety choice in the toughest workplace environments where heat, cold, humidity and exertion cause fogged safety eyewear. It’s used in forestry, utilities, pulp and paper, mining, chemical processing, law enforcement and other industries. The product is safe and effective on safety glasses, goggles and faceshields.

Rigorous lab testing confirms the real-world high performance of Defog It antifog. In one test, a lens treated with Defog It was held over constant hot steam for 60 minutes without fog forming. Similar products failed in as little as 5 minutes. In another test, lenses coated with Clarity Defog It were moved between cold and hot environments 100 times without fog forming.

Defog It is available as a liquid or reusable cloths. More information, pricing and performance videos are available at www.defogitworks.com or by calling 1-888-ENDS-FOG.

[Nanofilm](#), founded in 1985, is the maker of Clarity Defog It and a global optical leader in lens care and coatings. Millions of people around the world use Nanofilm products, including Clarity Clean It™, Clarity Defog It™ and other lens care products, as well as nanotechnology-enabled coatings.
