

Nanofilm introduces Defog It anti-fog liquid and towelettes Advanced formula anti-fog outperforms other leading brands

September 18, 2009 – Valley View, Ohio – Now there's an anti-fog product that's unmatched at keeping optics clear, fog-free and safe. Nanofilm, leading maker of lens care products, has launched Defog It anti-fog liquid and towelettes. The new products provide safe, highly effective, long-lasting fog prevention for all lenses and optics, including eyeglasses, safety glasses, ski goggles, scuba masks, shooting glasses and sunglasses.

"Fogged glasses, goggles and safety glasses are more than annoying," said Jodi Groh, Nanofilm's Director of Marketing. "They can be a safety hazard on the jobsite, the ski slope, and for hunters, fishermen, motorcyclists and do-it-yourselfers.

In lab testing Defog It outperforms five leading anti-fog brands. In the first test, each of six identical optical lenses was treated with a different anti-fog, then held over constant hot steam. After 60 minutes, no fog formed on the Defog It lens. The others failed in as little as 5 minutes.

In another test, lenses coated with various anti-fogs were moved between a 30° freezer and a 72° room. Fog formed almost immediately on other anti-fogs. Defog It stayed clear, even after 100 cycles of heat and cold.

Defog It is so reliable, the formula is used by the military worldwide to prevent fogging on mission-critical optics.

"There are so many unreliable anti-fog products on the market, many consumers have given up on finding something that works," says Scott Rickert, President of Nanofilm, maker of Defog It. "They just put up with fog, and that's dangerous. Defog It is the anti-fog people can trust to work."

Defog It is sold at Wal-Mart Vision Centers, Amazon and other retailers. Reusable Defog It dry towelettes provide maximum long-lasting anti-fog protection. Three reusable towelettes in a plastic carrying case sell for \$7.49 (MSRP). Defog It liquid is an all-in-one cleaner and anti-fog. A few drops removes everyday dirt and leave behind an invisible anti-fog barrier that lasts for hours. A half-ounce bottle is \$4.99 (MSRP).

Nanofilm, founded in 1985, is a global optical leader in lens care and coatings. Millions of people around the world use Nanofilm products, including Clarity Clean It™, Clarity Defog It™ and other lens care products, as well as nanotechnology-enabled coatings.
